Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 Terms related to actions	1
3.2 Terms related to devices	2
3.3 Terms related to systems	3
4 Background to unifying input actions across devices	4
4.1 Overview of input action, input device and interaction with user interface	4
4.2 Physical input actions	4
4.3 Logical input actions	4
4.4 Physical and logical input actions for ICT device connections	5
5 Need for unifying input actions	5
5.1 Overview	5
5.2 Device-specific input actions on user interfaces	6
5.3 Unifying input actions on user interfaces	6
6 Use cases of unifying input actions across devices	7
6.1 A simple closed system	7
6.2 A system with attached peripheral devices	7
6.3 Two systems interacting with one another	8
6.4 More complicated configurations	8
7 Framework of unification module for input actions	8
8 Requirements and recommendations	9
8.1 Functional requirements and recommendations	9
8.1.1 Input action receiving function	9
8.1.2 Physical input actions recognition function	9
8.1.3 Logical input actions identification function	9
8.1.4 Input actions conversion function	9
8.2 Additional requirements and recommendations	9
8.2.1 User interface	9
8.2.2 Conversion capability	10
8.2.3 Flexibility	11
8.2.4 Customizability	11
8.2.5 Scalability	11
8.2.6 Accessibility	12
Bibliography	13

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 35, *User interfaces*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.
