Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs)

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see patents.iec.ch).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology, Subcommittee SC 6, Telecommunications and information exchange between systems*, in collaboration with ITU-T. The identical text is published as ITU-T X.697 (02/2021).

This second edition cancels and replaces the first edition (ISO/IEC 8825-8:2018), which has been technically revised.

A list of all parts in the ISO/IEC 8825 series can be found on the ISO and IEC websites.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.

	3.3 Constraint Specification.....	2
	3.4 Parameterization of ASN.1 Specification	2
	3.5 Basic Encoding Rules (BER).....	2
	3.6 Packed Encoding Rules (PER).....	2
	3.7 Additional definitions	2
4	Abbreviations	3
5	Encodings specified by this Recommendation International Standard.....	3
6	Conformance.....	4
7	General provisions	4
	7.1 Use of the type notation	4
	7.2 Constraints	5
	7.3 Type and value model used for encoding.....	6
	7.4 Types to be encoded.....	6
	7.5 Encoding instructions.....	6
	7.6 Production of a complete JER encoding	7
8	Notation, lexical items and keywords used in JER encoding instructions	7
9	Specifying JER encoding instructions.....	8
10	Assigning a JER encoding instruction using a type prefix.....	9
11	Assigning a JER encoding instruction using a JER encoding control section.....	9
12	Identification of the targets for a JER encoding instruction.....	9
	12.1 General rules	9
	12.2 Types defined in the module.....	10
	12.3 Built-in types.....	10
	12.4 Types imported from another module.....	10
13	Multiple assignment of JER encoding instructions	10
	13.1 Order in which multiple assignments are considered.....	10
	13.2 Effect of assigning a negating encoding instruction	11
	13.3 Multiple assignment of JER encoding instructions of the same category	11
14	The ARRAY encoding instruction	11
	14.1 General	11

ISO/IEC 8825-8:2021(E)

14.2	Restrictions	11
15	The BASE64 encoding instruction	11
15.1	General	11
15.2	Restrictions	12
16	The NAME encoding instruction	12
16.1	General	12
16.2	Restrictions	13
17	The OBJECT encoding instruction	13
17.1	General	13
17.2	Restrictions	13
18	The TEXT encoding instruction	13
18.1	General	13
18.2	Restrictions	14
19	The UNWRAPPED encoding instruction	14
19.1	General	14
19.2	Restrictions	14
20	Encoding of boolean values	14
21	Encoding of integer values	15
22	Encoding of enumerated values	15
23	Encoding of real values	15
23.1	General	15
23.2	Encoding of the special real values	15
23.3	Encoding as a JSON number	16
23.4	Encoding as a JSON object	16
24	Encoding of bitstring values	16
24.1	General	16
24.2	Encoding of bitstring types with a fixed size	16
24.3	Encoding of bitstring types with a variable size	16
24.4	Alternative encoding of bitstring types with a JER-visible contents constraint	16
25	Encoding of octetstring values	17
25.1	General	17
25.2	Encoding of an octetstring value as a JSON string containing a Base64 encoding	17
25.3	Encoding of an octetstring value as a JSON string containing a hexadecimal encoding	17
25.4	Alternative encoding of an octetstring type with a JER-visible contents constraint	17
26	Encoding of the null value	17
27	Encoding of sequence values	17
27.1	General	17
27.2	Array-based encoding	17
27.3	Object-based encoding	17
