Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see <http://patents.iec.ch>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by ITU-T as ITU-T X.518 (10/2019) and drafted in accordance with its editorial rules, in collaboration with Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 6, *Telecommunications and information exchange between systems*.

This ninth edition cancels and replaces the eighth edition (ISO/IEC 9594-4:2017), which has been technically revised.

A list of all parts in the ISO/IEC 9594 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

CONTENTS

	<i>Page</i>
1 Scope	1
2 References	1
2.1 Normative references	1
2.2 Non-normative reference	2
3 Definitions	2
3.1 Basic Directory definitions	2
3.2 Directory model definitions	2
3.3 DSA information model definitions	2
3.4 Abstract service definitions	3
3.5 Protocol definitions	3
3.6 Directory replication definitions	3
3.7 Distributed operation definitions	3
4 Abbreviations	5
5 Conventions	5
6 Overview	6
7 Distributed Directory system model	7
8 DSA interactions model	8
8.1 Decomposition of a request	8
8.2 Uni-chaining	8
8.3 Multi-chaining	9
8.4 Referral	10
8.5 Mode determination	11
9 Overview of DSA abstract service	12
10 Information types	12
10.1 Introduction	12
10.2 Information types defined elsewhere	12
10.3 Chaining arguments	13
10.4 Chaining results	15
10.5 Operation progress	16
10.6 Trace information	17
10.7 Reference type	17
10.8 Access point information	17
10.9 DIT bridge knowledge	18
10.10 Exclusions	19
10.11 Continuation reference	19
11 Bind and Unbind	20
11.1 DSA Bind	20
11.2 DSA Unbind	21
12 Chained operations	21
12.1 Chained operations	22
12.2 Chained Abandon operation	22
12.3 Chained operations and protocol version	23
13 Chained errors	23
13.1 Introduction	23
13.2 DSA referral	23
14 Introduction	24
14.1 Scope and limits	24
14.2 Conformance	24
14.3 Conceptual model	24
14.4 Individual and cooperative operation of DSAs	24

14.5	Cooperative agreements between DSAs	25
15	Distributed Directory behaviour	25
15.1	Cooperative fulfilment of operations	25
15.2	Phases of operation processing	25
15.3	Managing Distributed Operations	26
15.4	Loop handling	27
15.5	Other considerations for distributed operation	28
15.6	Authentication of Distributed operations	29
16	The Operation Dispatcher	30
16.1	General concepts	30
16.2	Procedures of the Operation Dispatcher	35
16.3	Overview of procedures	36
17	Request Validation procedure	37
17.1	Introduction	37
17.2	Procedure parameters	38
17.3	Procedure definition	39
18	Name Resolution procedure	42
18.1	Introduction	42
18.2	Find DSE procedure parameters	42
18.3	Procedures	43
19	Operation evaluation	52
19.1	Modification procedures	53
19.2	Single entry interrogation procedure	60
19.3	Multiple entry interrogation procedure	60
20	Continuation Reference procedures	74
20.1	Chaining strategy in the presence of shadowing	74
20.2	Issuing chained subrequests to a remote DSA or LDAP server	76
20.3	Procedures' parameters	76
20.4	Definition of the procedures	77
20.5	Abandon procedures	86
20.6	DAP request to LDAP request procedure	88
20.7	LDAP result to DAP reply procedure	92
21	Results Merging procedure	94
22	Procedures for distributed authentication	96
22.1	Requester authentication	96
22.2	Results authentication	97
23	Knowledge administration overview	98
23.1	Maintenance of knowledge references	98
23.2	Requesting cross reference	99
23.3	Knowledge inconsistencies	100
24	Hierarchical operational bindings	101
24.1	Operational binding type characteristics	101
24.2	Operational binding information object Class definition	103
24.3	DSA procedures for hierarchical operational binding management	104
24.4	Procedures for operations	107
24.5	Use of application contexts	108
25	Non-specific hierarchical operational binding	108
25.1	Operational binding type characteristics	108
25.2	Operational binding information object class definition	109
25.3	DSA procedures for non-specific hierarchical operational binding management	109
25.4	Procedures for operations	111
25.5	Use of application contexts	111

	<i>Page</i>
Annex A – ASN.1 for Distributed Operations	112
Annex B – Specification of hierarchical and non-specific hierarchical operational binding types.....	116
Annex C – Example of distributed name resolution	118
Annex D – Distributed use of authentication.....	120
D.1 Summary	120
D.2 Distributed protection model.....	120
D.3 Signed chained operations.....	120
Annex E – Knowledge maintenance example	122
Annex F – Amendments and corrigenda	125
