<b>Foreword</b>	<b>v</b>
<b>Introduction</b>	<b>vi</b>
<b>1 Scope</b>	<b>1</b>
<b>2 Normative references</b>	<b>1</b>
<b>3 Terms and definitions</b>	<b>1</b>
3.1 Internet of media things terms	1
3.2 Internet of things terms	2
<b>4 Architecture</b>	<b>4</b>
<b>5 Use cases</b>	<b>5</b>
5.1 General	5
5.2 Smart spaces: Monitoring and control with network of audio-video cameras	8
5.2.1 General	8
5.2.2 Human tracking with multiple network cameras	8
5.2.3 Dangerous region surveillance system	8
5.2.4 Intelligent firefighting with IP surveillance cameras	9
5.2.5 Automatic security alert and title generation system using, time, GPS and visual information	9
5.2.6 Pedestrian-car accident detection in video using prediction result description	10
5.2.7 Networked digital signs for customized advertisement	10
5.2.8 Digital signage and second screen use	10
5.2.9 Self-adaptive quality of experience for multimedia applications	11
5.2.10 Ultra-wide viewing video composition	11
5.2.11 Face recognition to evoke sensorial actuations	12
5.2.12 Automatic video clip generation by detecting event information	12
5.2.13 Temporal synchronization of multiple videos for creating 360° or multiple view video	12
5.2.14 Intelligent similar content recommendations using information from IoMT devices	13
5.2.15 Understand and explain events in video by instance segmentation	13
5.2.16 Indoor/outdoor acoustic event detection	13
5.2.17 Safety equipment detection on construction sites	13
5.3 Smart spaces: Multi-modal guided navigation	14
5.3.1 General	14
5.3.2 Blind person assistant system	14
5.3.3 Elderly people assistance with consecutive vibration haptic devices	14
5.3.4 Personalized navigation by visual communication	15
5.3.5 Personalized tourist navigation with natural language functionalities	15
5.3.6 Smart identifier: Face recognition on smart glasses	16
5.3.7 Smart advertisement: QR code recognition on smart glasses	17
5.4 Smart audio/video environments in smart cities	17
5.4.1 General	17
5.4.2 Smart factory: Car maintenance assistance A/V system using smart glasses	17
5.4.3 Smart museum: Augmented visit using smart glasses	18
5.4.4 Smart house: enhanced perception modes	19
5.4.5 Smart house: control of home appliance devices	20
5.4.6 Smart car: Head-light adjustment and speed monitoring to provide automatic volume control	20
5.5 Smart audio/video environments in smart rural areas	21
5.5.1 General	21
5.5.2 Crop smart farming	21
5.5.3 Smart crop growth monitoring	21
5.5.4 Livestock smart farming	22
5.6 Smart multi-modal collaborative health	23

## ISO/IEC FDIS 23093-1:2025(en)

5.6.1	General	23
5.6.2	Increasing patient autonomy by remote control of left-ventricular assisted devices	23
5.6.3	Diabetic coma prevention	23
5.6.4	Enhanced physical activity with smart fabrics networks	24
5.6.5	Medical assistance with smart glasses	24
5.6.6	Managing healthcare information for smart glasses	25
5.6.7	Emergency health event detection with infrared camera	26
5.6.8	Personalized detection of health danger by multimodal data sensing and processing	26
5.6.9	Multimodal question answer with blood pressure data	27
5.6.10	Indoor air quality prediction	28
5.7	Blockchain usage for IoMT transactions authentication and monetizing	28
5.7.1	General	28
5.7.2	Reward function in IoMT people counting by using blockchains	28
5.7.3	Content authentication with blockchains	29
5.8	Metaverse usage of IoMT technologies	29
5.8.1	General	29
5.8.2	Human pose estimation for avatar animation	29
5.8.3	Facial landmark detection for human avatar animation	30

### ISO/IEC FDIS 23093-1

<https://standards.iteh.ai/catalog/standards/iso/c4497b40-e31c-41bb-a2c4-4d7d14038dda/iso-iec-fdis-23093-1>

## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives) or [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs)).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents) and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html). In the IEC, see [www.iec.ch/understanding-standards](http://www.iec.ch/understanding-standards).

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*.

This third edition cancels and replaces the second edition (ISO/IEC 23093-2:2022), which has been technically revised.

The main changes are as follows:

- complementary use cases;
- sequence diagrams and mission state diagrams for the use-case description in order to enhance the readability of the document.

A list of all parts in the ISO/IEC 23093 series can be found on the ISO and IEC websites.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html) and [www.iec.ch/national-committees](http://www.iec.ch/national-committees).
