Foreword	vi
Introduction	vii
1 Scope	1
2 Normative references	1
3 Terms, definitions and abbreviated terms	1
3.1 Terms and definitions	1
3.2 Abbreviated terms	7
4 Conformance	8
4.1 Intended usage	8
4.2 Full conformance	8
4.3 Conformance to processes	8
4.4 Conformance to information item content	8
4.5 Tailored conformance	9
4.5.1 Processes	9
4.5.2 Information items	9
5 Concepts	9
5.1 General	9
5.2 Requirements fundamentals	9
5.2.1 General	9
5.2.2 Stakeholders	9
5.2.3 Transformation of needs into requirements	10
5.2.4 Requirements construct	10
5.2.5 Characteristics of individual requirements	12
5.2.6 Characteristics of a set of requirements	13
5.2.7 Requirement language criteria	14
5.2.8 Requirements attributes	14
5.3 Practical considerations	16
5.3.1 Application of iteration and recursion	16
5.3.2 Iteration and recursion in requirements engineering	17
5.4 Requirement information items	18
6 Processes	20
6.1 Requirement processes	20
6.1.1 Guidelines for processes	20
6.2 Business or mission analysis process	21
6.2.1 Purpose	21
6.2.2 Outcomes	22
6.2.3 Activities and tasks	22
6.3 Stakeholder needs and requirements definition process	26
6.3.1 Purpose	26
6.3.2 Outcomes	26
6.3.3 Activities and tasks	26
6.4 System [System/Software] Requirements definition process	34
6.4.1 Purpose	34
6.4.2 Outcomes	35
6.4.3 Activities and tasks	35
6.5 Requirements engineering activities in other technical processes	41
6.5.1 Requirements activities in architecture definition	41
6.5.2 Requirements activities in verification	42
6.5.3 Requirements activities in validation	44
6.6 Requirements management	45
6.6.1 Management overview	45
6.6.2 Change management	46

6.6.3	Measurement for requirements	48
7	Information items	50
8	Guidelines for information items	51
8.1	Requirements information item outlines	51
8.2	Business requirements specification	51
8.2.1	General	51
8.2.2	BRS example outline	51
8.3	Stakeholder requirements specification	52
8.3.1	General	52
8.3.2	StRS example outline	53
8.4	System requirements specification	54
8.4.1	General	54
8.4.2	SyRS example outline	54
8.5	Software requirements specification	55
8.5.1	General	55
8.5.2	SRS example outline	56
9	Information item content	57
9.1	General	57
9.2	General content	57
9.2.1	Identification	57
9.2.2	Front matter	57
9.2.3	Definitions	58
9.2.4	References	58
9.2.5	Acronyms and abbreviations	58
9.3	Business requirements specification (BRS) content	58
9.3.1	BRS overview	58
9.3.2	Business purpose	58
9.3.3	Business scope	58
9.3.4	Business overview	59
9.3.5	Major Stakeholders	59
9.3.6	Business environment	59
9.3.7	Mission, goals and objectives	59
9.3.8	Business model	59
9.3.9	Information environment	59
9.3.10	Business processes	59
9.3.11	Business operational policies and rules	60
9.3.12	Business operational constraints	60
9.3.13	Business operational modes	60
9.3.14	Business operational quality	60
9.3.15	Business structure	60
9.3.16	High-level operational concept	60
9.3.17	High-level operational scenarios	60
9.3.18	Other high-level life-cycle concepts	61
9.3.19	Project constraints	61
9.4	Stakeholder requirements specification (StRS) content	61
9.4.1	StRS overview	61
9.4.2	Stakeholder purpose	61
9.4.3	Stakeholder scope	61
9.4.4	Overview	61
9.4.5	Stakeholders	61
9.4.6	Business environment	61
9.4.7	Mission, goals and objectives	62
9.4.8	Business model	62
9.4.9	Information environment	62
9.4.10	System processes	62
9.4.11	System operational policies and rules	62
9.4.12	Operational constraints	62

9.4.13	System operational modes and states	62
9.4.14	System operational quality	63
9.4.15	User requirements	63
9.4.16	Operational concept	63
9.4.17	Operational scenarios	63
9.4.18	Other detailed concepts of proposed system	63
9.4.19	Project constraints	64
9.5	System requirements specification (SyRS) content	64
9.5.1	SyRS overview	64
9.5.2	System purpose	64
9.5.3	System scope	64
9.5.4	System overview	64
9.5.5	Functional requirements	64
9.5.6	Usability requirements	64
9.5.7	Performance requirements	65
9.5.8	System interface requirements	65
9.5.9	System operations	65
9.5.10	System modes and states	66
9.5.11	Physical characteristics	66
9.5.12	Environmental conditions	66
9.5.13	System security requirements	66
9.5.14	Information management requirements	66
9.5.15	Policy and regulation requirements	67
9.5.16	System life cycle sustainment requirements	67
9.5.17	Packaging, handling, shipping and transportation requirements	67
9.5.18	Verification	67
9.5.19	Assumptions and dependencies	67
9.6	Software requirements specification (SRS) content	67
9.6.1	SRS overview	67
9.6.2	Purpose	67
9.6.3	Scope	67
9.6.4	Product perspective	68
9.6.5	Product functions	69
9.6.6	User characteristics	70
9.6.7	Limitations	70
9.6.8	Assumptions and dependencies	70
9.6.9	Apportioning of requirements	71
9.6.10	Specified requirements	71
9.6.11	External interfaces	71
9.6.12	Functions	72
9.6.13	Usability requirements	72
9.6.14	Performance requirements	72
9.6.15	Logical database requirements	73
9.6.16	Design constraints	73
9.6.17	Standards compliance	73
9.6.18	Software system attributes	73
9.6.19	Verification	74
9.6.20	Supporting information	74
Annex A (normative)	System operational concept	75
Annex B (informative)	Concept of operations	87
Annex C (normative)	Tailoring policies	89

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and nongovernmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the rules given in the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

IEEE Standards documents are developed within the IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Association (IEEE-SA) Standards Board. The IEEE develops its standards through a consensus development process, approved by the American National Standards Institute, which brings together volunteers representing varied viewpoints and interests to achieve the final product. Volunteers are not necessarily members of the Institute and serve without compensation. While the IEEE administers the process and establishes rules to promote fairness in the consensus development process, the IEEE does not independently evaluate, test, or verify the accuracy of any of the information contained in its standards.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 7, *Systems and software engineering*, in cooperation with the Systems and Software Engineering Standards Committee of the IEEE Computer Society, under the Partner Standards Development Organization cooperation agreement between ISO and IEEE.

This second edition cancels and replaces the first edition (ISO/IEC/IEEE 29148:2011), which has been technically revised.

Changes in this revision of ISO/IEC/IEEE 29148 were developed in response to the revision of ISO/IEC/IEEE 15288 and ISO/IEC/IEEE 12207. The purpose of these revisions is to accomplish the harmonization of the structures and contents of the two documents, while supporting the requirements of the assessment community.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

This document provides a unified treatment of the processes and products involved in engineering requirements throughout the life cycle of systems and software. It provides details for the construct of well-formed textual requirements, to include characteristics and attributes, in the context of system and software engineering. This document also provides guidance for the implementation of requirements related processes from ISO/IEC/IEEE 15288 and ISO/IEC/IEEE 12207. Finally, this document identifies information items related to requirements engineering and their content.
