About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

CONTENTS

FOREWORD.....	3
INTRODUCTION.....	5
1 Scope.....	6
2 Normative references	6
3 Terms, definitions and abbreviated terms	6
3.1 Terms and definitions.....	6
3.2 Abbreviated terms.....	6
4 Applications for 10 gigabits per second and beyond	6
5 Optical fibre cabling infrastructure considerations.....	9
5.1 Array-based fibre cabling systems	9
5.2 Array-based fibre cabling systems for duplex applications.....	9
5.2.1 General	9
5.2.2 Data rate upgrades for duplex multimode channels.....	10
5.2.3 Data rate upgrades for single fibre or duplex single-mode channels.....	10
5.3 Array-based fibre cabling systems and migration from duplex to parallel applications	10
5.4 Array-based fibre cabling systems for parallel applications	11
5.4.1 General	11
5.4.2 Data rate upgrades for parallel multimode channels.....	11
5.4.3 Data rate upgrades for parallel single-mode channels.....	11
6 Multimode fibre cabling selection guidance	12
Annex A (informative) Summary of optical fibre applications	13
A.1 Duplex and parallel multimode fibre applications.....	13
A.2 Single fibre, duplex, and parallel single-mode fibre applications.....	13
Bibliography.....	15
Figure 1 – Example array-based cabling constructions for multiple duplex fibre applications	9
Figure 2 – Example array-based cabling constructions for parallel fibre applications.....	11
Table 1 – Multimode applications standardized in IEEE for Ethernet and INCITS for Fibre Channel	7
Table 2 – Multimode applications in progress of standardization in IEEE for Ethernet and INCITS for Fibre Channel	7
Table 3 – Multimode applications covered by Multi-Source Agreements.....	7
Table 4 – Single-mode applications standardized in IEEE for Ethernet and INCITS for Fibre Channel	8
Table 5 – Single-mode applications in progress of standardization in IEEE for Ethernet and INCITS for Fibre Channel	8
Table 6 – Single-mode applications covered by Multi-Source Agreements	9
Table A.1 – Duplex and parallel multimode fibre applications	13
Table A.2 – Single fibre, duplex and parallel single-mode fibre applications	14
