Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms, definitions, symbols and abbreviated terms	1
4 Understanding demographic factors in biometric systems	3
4.1 Introduction.....	3
4.2 Biometric system components.....	4
4.3 The influence of demographics on biometric recognition.....	4
4.3.1 The influence of sex and gender.....	4
4.3.2 The influence of age and ageing.....	4
4.3.3 The influence of race and ethnicity.....	5
4.4 Measurement and analysis.....	5
5 Impact of demographic factors on facial recognition systems	5
5.1 Existing literature on demographic factors impacting facial recognition systems.....	5
5.1.1 General notes.....	5
5.1.2 Factors that influence algorithm performance in the Face Recognition Grand Challenge.....	6
5.1.3 Face recognition performance: Role of demographic information.....	6
5.1.4 Issues related to face recognition accuracy varying based on race and skin tone.....	6
5.1.5 Report on the FG 2015 Video Person Recognition Evaluation.....	6
5.1.6 Demographic effects on estimates of automatic face recognition performance.....	7
5.1.7 US National Institute of Standards and Technology (NIST) FRVT test.....	7
5.1.8 Demographic effects in facial recognition and their dependence on image acquisition: An evaluation of eleven commercial systems.....	11
5.1.9 The effect of broad and specific demographic homogeneity on the imposter distributions and false match rates in face recognition algorithm performance.....	12
5.2 Summary of demographic impact on facial recognition systems.....	12
5.3 Recommendations for facial recognition systems.....	12
6 Impact of demographic factors on fingerprint systems	13
6.1 Existing literature on demographic factors impacting fingerprint systems.....	13
6.1.1 General notes.....	13
6.1.2 IDENT/IAFIS image quality study.....	13
6.1.3 Impact of gender on fingerprint recognition systems.....	14
6.1.4 Impact of gender on image quality, Henry classification and performance on a fingerprint recognition system.....	14
6.1.5 Impact of age and ageing on sample quality and performance in fingerprint recognition systems.....	14
6.2 Summary of demographic impact on fingerprint systems.....	15
6.3 Recommendations for fingerprint systems.....	15
7 Impact of demographic factors on iris recognition systems	15
7.1 Existing literature on demographic factors impacting iris recognition systems.....	15
7.1.1 General notes.....	15
7.1.2 The Canadian NEXUS system.....	16
7.1.3 Impact of demographics in NIST IREX IX.....	18
7.2 Summary of demographic impact on iris recognition systems.....	18
7.3 Recommendations for iris recognition systems.....	18
8 Summary of the differential impact of demographic factors in biometric recognition system performance	19
Bibliography	20

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see patents.iec.ch).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 37, *Biometrics*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.
