Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Architectural principles for secure products, systems and applications	2
4.1 General	2
4.2 Domain separation	3
4.2.1 General	3
4.2.2 Principles for defining domain structures	3
4.2.3 Principles for defining inter-domain communication	3
4.2.4 Security policies that may be enforced using domain separation	4
4.2.5 Examples	4
4.2.6 Considerations for evaluation	4
4.3 Layering	5
4.3.1 General	5
4.3.2 Principles for defining layers	5
4.3.3 Principles for Interfaces exposed by a layer	5
4.3.4 Security policies that may be enforced using layering	5
4.3.5 Examples	6
4.3.6 Considerations for evaluation	6
4.4 Encapsulation	6
4.4.1 General	6
4.4.2 Principles for defining encapsulation	7
4.4.3 Security policies that may be enforced using encapsulation	7
4.4.4 Examples	7
4.4.5 Considerations for evaluation	7
4.5 Redundancy	7
4.5.1 General	7
4.5.2 Principles for defining redundant elements	8
4.5.3 Principles for keeping consistency between redundant elements	8
4.5.4 Security policies that may be enforced using redundancy	8
4.5.5 Examples	8
4.5.6 Considerations for evaluation	9
4.6 Virtualization	10
4.6.1 General	10
4.6.2 Principles for defining virtualization	10
4.6.3 Security policies that may be enforced using virtualization	10
4.6.4 Examples	11
4.6.5 Considerations for evaluation	11
5 Design principles	11
5.1 General	11
5.2 List of design principles for security	12
5.2.1 Least privilege	12
5.2.2 Attack surface minimization	13
5.2.3 Centralized parameter validation	15
5.2.4 Centralized general security services	17
5.2.5 Preparing for error and exception handling	18
5.3 Using the design principles when designing a secure system or application	20
5.3.1 General	20
5.3.2 Least privilege	20
5.3.3 Attack surface minimization	20

5.3.4	Centralized parameter validation	20
5.3.5	Centralized security services	20
5.3.6	Preparing for error and exception handling	21
6	Evaluation activities for the architectural principles	21
6.1	General	21
6.2	Domain separation	22
6.3	Layering	23
6.4	Encapsulation	23
6.5	Redundancy	24
6.6	Virtualization	25

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 27, *IT Security techniques*.
