Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Governing principles	2
5 Guidelines	2
5.1 Guidelines for Principle 1: Readers get what they need (relevant)	2
5.1.1 Initial steps	2
5.1.2 Use a collaborative writing process from the start	3
5.1.3 Layer information for multiple readers	3
5.1.4 Identify necessary related content	4
5.1.5 Use templates and other existing documents carefully	4
5.2 Guidelines for Principle 2: Readers can easily find what they need (findable)	4
5.2.1 Initial steps	4
5.2.2 Use headings that convey meaning to the reader	4
5.2.3 Use introductions to help readers understand scope and purpose	4
5.2.4 Use design techniques to highlight information from multiple perspectives	4
5.2.5 Evaluate the consequences of readers missing important information	5
5.2.6 Minimize the need for knowledge of other documents	5
5.2.7 Use numbering systems for easy cross-referencing	5
5.3 Guidelines for Principle 3: Readers can easily understand what they find (understandable)	5
5.3.1 Initial steps	5
5.3.2 Choose familiar, legally accurate words	6
5.3.3 Define or explain words and phrases that can be unfamiliar or confusing to readers	6
5.3.4 Use graphics where they clarify content	7
5.3.5 Use consistent terms for the same concepts	7
5.3.6 Use an appropriate degree of precision	7
5.3.7 Eliminate ambiguity	8
5.4 Guidelines for Principle 4: Readers can easily use the information (usable)	8
Annex A (informative) Overview of plain language guidelines	9
Annex B (informative) Sample checklist for authors of legal documents	11
Bibliography	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 37, *Language and terminology*.

A list of all parts in the ISO 24495 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
