Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Principle	4
5 Apparatus	5
5.1 Testing machine	5
5.2 Gripping system	5
5.2.1 Test specimen gripping	5
5.2.2 Location and temperature of grips	5
5.2.3 Load train couplers	6
5.3 Test chamber and heating set-up	6
5.4 Heating apparatus	7
5.5 Strain measurement	7
5.5.1 General	7
5.5.2 Extensometers	7
5.5.3 Digital image correlation	8
5.6 Temperature measurement devices	8
5.7 Data recording system	8
5.8 Dimension-measuring devices	9
6 Tubular test specimen	9
6.1 Specimen specifications	9
6.1.1 General	9
6.1.2 Dimension	9
6.1.3 Geometry commonly used	9
6.1.4 Tolerances and variability	11
6.2 Specimen preparation	11
6.2.1 General	11
6.2.2 As-fabricated	11
6.2.3 Application-matched machining	11
6.2.4 Customary practices	12
6.2.5 Standard procedure	12
6.3 End collars and alignment issue	12
6.4 Test count and test specimens sampling	14
7 Test procedure	14
7.1 Temperature considerations	14
7.1.1 General	14
7.1.2 Controlled temperature zone	14
7.1.3 Temperature measurement	15
7.2 Test set-up: other considerations	15
7.3 Testing technique	15
7.3.1 Measurement of test specimen dimensions	15
7.3.2 Instrumentation of the test specimen	16
7.3.3 Specimen mounting	16
7.3.4 Setting-up of strain measurement means	16
7.3.5 Setting-up of inert atmosphere	16
7.3.6 Heating of test specimen and temperature control	16
7.3.7 Measurements	17
7.3.8 Post-test analyses	17
7.4 Test validity	17
8 Calculation of results	18
8.1 Test specimen origin	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 206, *Fine ceramics*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 184, *Advanced technical ceramics*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
