	Page
Foreword.....	v
Introduction.....	vi
1 Scope.....	1
2 Normative references.....	1
3 Terms and definitions.....	1
4 Concept.....	1
4.1 Perspectives in different contexts.....	1
4.2 Definitions in ISO documents.....	2
5 Disaster risk.....	3
5.1 General.....	3
5.2 Climate-induced.....	4
5.3 Earthquake-induced.....	5
5.4 Human-induced.....	6
6 Countermeasure.....	6
6.1 Strategy.....	6
6.2 Measurement.....	8
7 Compilation of existing information.....	9
7.1 Concept.....	9
7.1.1 Terminology: Resilience ^[10]	9
7.1.2 Built-in resilience through disaster risk reduction: operational issues ^[36]	9
7.1.3 Four concepts for resilience and the implications for the future of resilience engineering ^[37]	9
7.1.4 Sendai Framework for Disaster Risk Reduction 2015-2030 ^[38]	9
7.2 Climate-induced.....	10
7.2.1 Global Assessment Report on Disaster Risk Reduction ^[39]	10
7.2.2 Emergency Events Database (EM-DAT) ^[40]	10
7.2.3 Global Warming of 1,5 °C ^[32]	10
7.2.4 Climate Change 2014: Synthesis Report ^[41]	10
7.2.5 Climate Change 2013: The Physical Science Basis ^[30]	10
7.2.6 Global Climate Risk Index ^[42]	11
7.2.7 Climate Change Knowledge Portal (CCKP) ^[43]	11
7.2.8 CREAT Climate Scenarios Projection Map ^[44]	11
7.2.9 Climate Projections ^[45]	11
7.2.10 UK Climate Projections (UKCP) ^[46]	11
7.2.11 Climate Atlas of Canada ^[47]	11
7.2.12 CEDIM Risk Explorer Germany ^[48]	12
7.2.13 Sea Level Rise Viewer ^[49]	12
7.2.14 Will half a degree make a difference? Robust projections of indices of mean and extreme climate in Europe under 1,5 °C, 2 °C, and 3 °C global warming ^[50]	12
7.2.15 North China Plain threatened by deadly heatwaves due to climate change and irrigation ^[51]	12
7.2.16 Climate Change 2014: Impacts, Adaptation, and Vulnerability ^[52]	13
7.2.17 National Climate Assessment ^[53]	13
7.2.18 Myanmar National Framework for Community Disaster Resilience ^[54]	13
7.3 Earthquake-induced.....	13
7.3.1 Global Seismic Risk Map ^[55]	13
7.3.2 Global Earthquake Fatalities and Population ^[56]	13
7.3.3 Earthquakes ^[57]	14
7.3.4 China Earthquake Networks ^[58]	14
7.3.5 Japan Meteorological Agency ^[59]	14
7.3.6 2011 Christchurch earthquake ^[60]	14

7.4	Human-induced — Global Terrorism Index 2018: Measuring the impact of terrorism ^[35]	14
7.5	Strategy	15
7.5.1	Community resilience planning guide for buildings and infrastructure systems - Volume I ^[61]	15
7.5.2	Climate-Resilient Buildings and Core Public Infrastructure Initiative (CRBCPI) ^[62]	15
7.5.3	RELi ^[63]	15
7.5.4	LEED IPpc98/IPpc99/IPpc100 ^{[64],[65],[66]}	15
7.5.5	DGNB criteria "Local environment" ^[67]	16
7.5.6	BREEAM Adaption to Climate Change ^[68]	16
7.5.7	Durability and Climate Change: Changing climatic loads as may affect the durability of building materials, components and assemblies ^[69]	16
7.5.8	Ocean at the door ^[70]	16
7.5.9	Inundation Mapping ^[71]	16
7.5.10	Climate Resiliency Design Guidelines – Version 3.0 ^[72]	16
7.5.11	Coastal Flood Resilience Design Guidelines ^[73]	17
7.5.12	Flood Resilient Homes Program ^[74]	17
7.5.13	Designing flood resilience into new buildings ^[75]	17
7.5.14	Resilient Design Institute ^[8]	17
7.5.15	Boston’s Spaulding Rehabilitation Center designed with rising sea levels in mind ^[76]	17
7.5.16	Cognitive infrastructure – a modern concept for resilient performance under extreme events ^[77]	17
7.5.17	A framework to quantitatively assess and enhance the seismic resilience of communities ^[78]	18
7.5.18	Earthquake Disaster Simulation of Civil Infrastructures: From Tall Buildings to Urban Areas ^[79]	18
7.5.19	Resilience of a hospital Emergency Department under seismic event ^[80]	18
7.5.20	Strict building codes helped Anchorage withstand quake ^[81]	18
7.5.21	2019 Ridgecrest earthquakes ^[82]	19
7.5.22	Integrating counter-terrorist resilience into sustainability ^[83]	19
7.5.23	Resilient Design Tool: For Counter Terrorism ^[84]	19
7.5.24	Climate change resilience strategies for the building sector: examining existing domains of resilience utilized by design professionals ^[85]	19
7.6	Measurement	20
7.6.1	USRC Building Rating System ^[86]	20
7.6.2	B-READY ^[87]	20
7.6.3	FORTIFIED Commercial™ ^[88]	20
7.6.4	Attributes and metrics for comparative quantification of disaster resilience across diverse performance mandates and standards of building ^[89]	20
7.6.5	The Resilient City ^[90]	21
7.6.6	Seismic Performance Assessment of Buildings ^[91]	21
7.6.7	Standard for Seismic Resilience Assessment of Building ^[92]	21
7.6.8	REDi™ Rating System ^[93]	21
7.6.9	Framework for analytical quantification of disaster resilience ^[94]	21
	Bibliography	22

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 59, *Buildings and civil engineering works*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
