Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Functional and smart textile products	2
4.1 Functional textile products.....	2
4.1.1 General.....	2
4.1.2 Electrically conductive textile products.....	2
4.1.3 Thermally conductive textile products.....	3
4.1.4 Thermally radiative (emissive) textile products.....	3
4.1.5 Optically conductive textile products.....	3
4.1.6 Fluorescent textile products.....	3
4.1.7 Phosphorescent textile products.....	4
4.1.8 Textile products releasing substances.....	4
4.2 Smart (intelligent) textile products.....	4
4.2.1 General.....	4
4.2.2 Chromic textile products.....	5
4.2.3 Phase change textile products.....	5
4.2.4 Textile products with active ingredients inside the microcapsules.....	6
4.2.5 Shape change (shape memory) textile products.....	6
4.2.6 Super-absorbing polymers and gels.....	6
4.2.7 Auxetic textile products.....	7
4.2.8 Dilating and shear-thickening textile products.....	7
4.2.9 Piezoelectric textile products.....	7
4.2.10 Electroluminescent textile products.....	7
4.2.11 Thermo-electric textile products.....	8
4.2.12 Photovoltaic textile products.....	8
4.2.13 Electrolytic textile products.....	8
4.2.14 Capacitive textile products.....	8
5 Smart textile systems	9
5.1 Categories.....	9
5.1.1 General.....	9
5.1.2 Systems without energy or communication function (NoE-NoCom).....	11
5.1.3 Systems with energy function, but without communication function (E-NoCom).....	11
5.1.4 Systems with communication function but without energy function (noE-Com).....	11
5.1.5 With energy and communication function (E-Com).....	12
5.2 Examples of “Smart textile systems” and their functional analysis.....	12
5.2.1 Medical application: monitoring of health situation.....	12
5.2.2 Occupational safety application: work wear and protective clothing.....	13
5.2.3 Leisure and fashion application.....	14
5.2.4 Garment based on thermal control by phase change materials (PCM).....	14
5.2.5 Heated garment, car seats, etc. for comfort or protection.....	14
5.2.6 Irradiation system for medical therapeutics.....	15
5.2.7 Geotextiles applications.....	16
6 Considerations for standardization	16
6.1 General.....	16
6.2 Verification of claimed performances.....	17
6.3 Innocuousness.....	17
6.4 Durability of properties.....	18
6.5 Product information.....	18

6.6	Environmental aspects.....	19
6.7	Examples of possible standardization of smart (intelligent) textile products and systems	19
6.7.1	Smart (intelligent) textile products — Phase change materials (PCM)	19
6.7.2	Smart textile systems — Heating textile with temperature control.....	20

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 38, *Textiles*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 248, *Textiles and textile products*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
