Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Abbreviated terms	5
5 General overview and framework	5
6 Requirements	8
6.1 Threat, vulnerability and risk analysis.....	8
6.2 Functional requirements for security of targets of evaluation (TOEs).....	8
6.2.1 TOE — In-vehicle systems.....	8
6.2.2 TOE — Application service provider systems.....	8
6.2.3 TOE — TARV data transfer.....	9
6.2.4 Means of TARV data transfer.....	9
6.2.5 TARV data security requirements.....	9
6.3 General specifications for the security of TARV.....	9
6.3.1 Destined to a predetermined IPv6 address (URI).....	9
6.3.2 ASP or jurisdiction determines security requirements.....	10
6.4 Low security data transfers via an ITS-station.....	10
6.5 TARV Data transfers via an ITS-station with C-ITS security (BSMD).....	10
6.5.1 Within ISO 21217 ITS-station environment.....	10
6.5.2 Within ISO 21210 networking environment.....	10
6.5.3 Within ISO 17423 selection of communications profile requirements.....	10
6.5.4 When accessing specific wireless media.....	10
6.6 TARV data transfers including defined security, but outside a BSMD.....	11
6.6.1 General.....	11
6.6.2 Security data.....	12
6.6.3 IVS TARV security module.....	12
6.7 Identity management.....	12
6.8 Trust and privacy management.....	12
6.9 Access control.....	12
6.10 Confidentiality services.....	12
6.11 Data privacy.....	12
6.12 Integrity of trailer identification.....	13
6.13 Exception handling.....	13
6.14 Cross-border operations and harmonization.....	13
7 Quality of service requirements	13
8 Test requirements	13
9 Marking, labelling and packaging	13
Annex A (informative) Example TARV security in a regulatory domain	14

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 204, *Intelligent transport systems*.

A list of all parts in the ISO 15638 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
