

Technical Specification

ISO/TS 19677

Assessing the adverse impact of wildland fires on the environment and to people through environmental exposure

*Évaluation de l'impact négatif des feux d'espaces naturels
sur l'environnement et les personnes par exposition
environnementale*

**Second edition
2025-07**

Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Wildland fire variables	2
5 Environmental impact of wildland fires	3
5.1 General	3
5.2 Fire testing and data collection	3
5.3 Impact of wildland fire on air	4
5.3.1 Nature of impact	4
5.3.2 Quantification of impact	4
5.3.3 Mitigation of impact	4
5.4 Impact of wildland fire on water	4
5.4.1 Nature of impact	4
5.4.2 Quantification of impact	5
5.4.3 Mitigation of impact	5
5.5 Impact of wildland fire on soil	6
5.5.1 Nature of impact	6
5.5.2 Quantification of impact	6
5.5.3 Mitigation of impact	6
5.6 Impact of wildland fire on vegetation	6
5.6.1 Nature of impact	6
5.6.2 Quantification of impact	7
5.6.3 Mitigation of impact	7
5.7 Impact of wildland fire on wildlife	7
5.7.1 Nature of impact	7
5.7.2 Quantification of impact	7
5.7.3 Mitigation of impact	7
5.8 Impact of wildland fire on exposed human populations	7
5.8.1 Nature of impact	7
5.8.2 Quantification of impact	8
5.8.3 Minimising health threats to exposed human populations	8
5.9 Impact of wildland fire on firefighters	9
5.9.1 Nature of impact	9
5.9.2 Quantification of impact	9
5.9.3 Mitigation of impact	9
5.10 Impact of wildland fire on food production	9
5.10.1 Nature of impact	9
5.10.2 Quantification of impact	9
5.10.3 Mitigation of impact	10
5.11 Impact of wildland fire on land, sea and air traffic	10
5.11.1 Nature of impact	10
5.11.2 Quantification of impact	10
5.11.3 Mitigation of impact	10
5.12 Impact of wildland fire on the built environment	10
5.12.1 Nature of impact	10
5.12.2 Quantification of impact	10
5.12.3 Mitigation of impact	10
6 The impact of firefighting activities	11
6.1 Nature of impact	11
6.2 Quantification of impact	11
6.3 Mitigation of impact	11

Annex A (informative) Wildland fire incidents and their environmental impact	12
Annex B (informative) Airborne combustion products identified from wildland fires	15
Annex C (informative) Firefighting chemical additives and their environmental impact	16
Annex D (informative) Impact of climate change	17
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 92, *Fire safety*, Subcommittee SC 3, *Fire threat to people and environment*.

This second edition cancels and replaces the first edition (ISO/TS 19677:2019), which has been technically revised.

The main change is as follows:

- an addition on Canadian WUI fires has been added.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
