Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 310, *Child care articles*.

A list of all parts in the ISO 24929 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Child care articles — General safety —

Part 5: Product information

1 Scope

This document establishes good practices for drafting product information requirements in standards related to child care articles. [Annex A](#) provides rationales for these requirements.

2 Normative references

There are no normative references in this document.

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminology databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <https://www.electropedia.org/>

3.1 product information

text, images, video, etc., provided in printed and/or digital formats that can accompany or be associated with a specific child care article

Note 1 to entry: This includes *marking of the product* ([3.2](#)) and any packaging, *purchase information* ([3.3](#)) and *instructions for use* ([3.4](#)).

3.2 marking of the product

product information ([3.1](#)) permanently attached to the child care article

Note 1 to entry: All markings belong to one of the categories “*purchase information* ([3.3](#))” or “*instructions for use* ([3.4](#))”, or both.

3.3 purchase information

information provided at the point of sale that will enable the purchaser to make an informed choice before purchasing the product

Note 1 to entry: This information may be on the product, its packaging and/or other points of sale, such as web pages and mail order catalogues.

3.4 instructions for use

information provided regarding safe use of the product

Note 1 to entry: This may comprise information on safety, assembly, installation, operation, storage, maintenance, repair, disposal, etc., where appropriate.
