This draft European Standard is submitted to CEN members for second enquiry. It has been drawn up by the Technical Committee CEN/TC 252.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

## European foreword

This document (prEN 14372:2025) has been prepared by Technical Committee CEN/TC 252 "Child care articles", the secretariat of which is held by AFNOR.

This document is currently submitted to the second CEN Enquiry.

This document will supersede EN 14372:2004.

The main changes compared to the previous edition are listed below:

- Introduction: Completely reworded and references to European regulations have been renewed.
- Clause 3: Old definitions have been revised and new parts have been added, e.g. food feeder.
- Clause 4: New parts have been added.
- Clause 5: This clause is completely new.
- Clause 6: This clause is completely new.
- Clause 7: The whole clause has been divided into several sub-paragraphs for individual tests, and several paragraphs for new items and their tests have been added.
- Clause 8: This clause has been completely restructured and subdivided. Chemical requirements and test methods have been set for materials (like rubber, silicon, TPE, metal, glass) and exposures (mouthing and swallowing) which are recently not covered by harmonized legislation. Requirements for substances (e.g. Phthalate content, BPA release) which are covered by harmonized regulation (like REACH, (EU) 10/2011 or its amendments) have not been included.
- Clause 9 This clause is completely new.
- Clause 10: Revised and partly reworded.
- Clause 11: This clause on the test report is completely new.
- Annex A: This informative annex with translations of warnings into 24 languages is completely new.
- Annex B: This informative annex with rationales is completely new.
- Annex C: This informative annex on good practice for visibility and legibility is completely new.
- Annex ZA: This informative annex regarding relationship between this standard and the safety requirements of Regulation 2023/988/EC aimed to be covered is completely new.

This document has been prepared under a standardization request addressed to CEN by the European Commission. The Standing Committee of the EFTA States subsequently approves these requests for its Member States.

For the relationship with EU Legislation, see informative Annex ZA, which is an integral part of this document.
