EUROPÄISCHE NORM

DRAFT
prEN 15450

January 2026

ICS 27.080

Will supersede EN 15450:2007

English Version

Heating systems in buildings - Design of heat pump heating systems

Systèmes de chauffage dans les bâtiments - Conception
des systèmes de chauffage par pompe à chaleur

Heizungsanlagen in Gebäuden - Planung von
Heizungsanlagen mit Wärmepumpen

This draft European Standard is submitted to CEN members for enquiry. It has been drawn up by the Technical Committee CEN/TC 228.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

European foreword	6
Introduction	7
1 Scope	8
2 Normative references	9
3 Terms, definitions, symbols and abbreviated terms	9
3.1 Terms and definitions	9
3.2 Symbols, units, indices and abbreviations.....	13
4 General information	17
4.1 Heat pump system types and nomenclature.....	17
4.2 System boundaries and definition of efficiency.....	20
4.3 Basic design requirements (for heating and cooling)	22
4.3.1 Global objective	22
4.3.2 Source and sink temperature	23
4.3.3 Correct sizing of the heat pump.....	24
4.3.4 Provision of sufficient flow rate in the heat pump (primary loop).....	24
4.3.5 Provide enough water volume in the installation.....	25
4.3.6 Environmental impact	26
4.3.7 Service specific issues when providing comfort services	26
4.3.8 Safety considerations	30
5 Preliminary design phase	31
5.1 Introduction.....	31
5.2 Information collection for preliminary design.....	32
5.2.1 User (owner) needs and objectives.....	32
5.2.2 Performance objectives.....	32
5.2.3 Regulatory requirements.....	32
5.3 Space heating power requirements – heat load calculation	33
5.4 Space cooling power requirements – cooling load calculation	34
5.5 Domestic hot water power requirements.....	34
5.6 Available resources.....	35
5.6.1 General.....	35
5.6.2 Heat source – outdoor air	36
5.6.3 Heat source – ground – vertical borehole	37
5.6.4 Heat source – ground – horizontal heat exchanger	38
5.6.5 Heat source – ground water	38
5.6.6 Heat source – surface water	39
5.6.7 Other heat sources.....	39
5.6.8 Driving energy	40
5.6.9 Indoor space requirements.....	41
5.7 Heat emission and distribution system	41
5.7.1 General.....	41
5.7.2 Heating mode	41
5.7.3 Cooling mode	45
5.8 Providing a system concept.....	45
5.8.1 Introduction.....	45

5.8.2	Functional diagram selection.....	46
5.8.3	Integration with on-site renewable electricity generation.....	46
5.8.4	Preliminary heat pump sizing.....	47
5.8.5	Preliminary storage volume sizing.....	57
5.8.6	Provisional layout.....	60
5.8.7	Control rationale.....	61
5.8.8	Expected performances.....	61
5.8.9	Economic evaluation.....	61
5.9	Decision to proceed.....	61
6	Final design.....	62
6.1	Introduction and general provisions.....	62
6.2	Information collection for final design.....	64
6.3	Space heating requirements - heat load.....	64
6.4	Space cooling power requirements - cooling load.....	64
6.5	Domestic hot water power requirements.....	66
6.6	Available resources - heat source selection and sizing.....	66
6.6.1	General.....	66
6.6.2	Heat source - outdoor air.....	66
6.6.3	Heat source - ground - vertical borehole.....	67
6.6.4	Heat source - ground horizontal heat exchanger.....	67
6.6.5	Heat source - ground water.....	68
6.6.6	Heat source - surface water.....	69
6.6.7	Heat rejection.....	70
6.6.8	Free cooling or heating using the ground heat exchanger.....	70
6.7	Heat emission and distribution system.....	71
6.7.1	General.....	71
6.7.2	Heating mode.....	71
6.7.3	Cooling mode.....	73
6.8	Final heat pump system design.....	73
6.8.1	Heat pump selection.....	73
6.8.2	Hydraulic connections and flow rates.....	74
6.8.3	Usage of renewable energy and electrical storage.....	75
6.8.4	Heat pump sizing.....	75
6.8.5	Storage volume sizing.....	76
6.8.6	System layout.....	76
6.8.7	Control logics and sequence.....	77
6.8.8	Instructions for operation maintenance and use.....	77
6.8.9	Authorizations and permits.....	77
6.9	Deliverables.....	78
6.9.1	Final design.....	78
6.9.2	Hand-over documentation.....	79
Annex A (normative)	Input data, structure for default values.....	80
A.1	General.....	80
A.2	Input Data for preliminary design phase (5).....	80
Annex B (normative)	Input data, default values.....	85
B.1	General.....	85
B.2	Input Data for preliminary design phase (5).....	85
B.3	Input data for simplified heat load calculation.....	86
B.4	Input data for simplified DHW design requirements.....	89

prEN 15450:2026 (E)

B.5	Input data for simplified cooling load design requirements	107
Annex C (normative)	Simplified methods for determining the building heat load	110
C.1	General.....	110
C.2	Building envelope method based on EN 12831-1	110
C.3	Heat load calculation based on measured energy use	112
C.4	Heat load calculation by energy performance calculation	116
Annex D (informative)	Simplified methods for determining the heat load and storage volume for domestic hot water.....	118
D.1	General.....	118
D.2	Simplified method for DHW design requirements based on energy needs.....	120
D.3	Simplified summation curve method taken from EN 12831-3.....	121
D.4	Conversion tables Energy – Storage Volume for DHW	122
Annex E (informative)	Simplified method for determining the cooling load of a building.....	125
E.1	General description of the method.....	125
E.2	Solar radiation through transparent elements $\Phi_{s,tr}$.....	126
E.3	Solar heat transmission through poorly insulated opaque structures $\Phi_{s,op}$.....	126
E.4	Orientation and simultaneity of solar radiation	127
E.5	Internal loads	127
E.6	Cooling effect from heat capacity in structures	128
Annex F (normative)	Guidelines for determining design parameters	130
F.1	Definitions.....	130
F.2	Design parameters for heat pumps using water as a heat source	130
F.3	Design parameters for heat pumps using ground as a heat source.....	130
Annex G (informative)	Basic hydraulic circuits.....	135
G.1	General.....	135
G.2	Basic (standard) hydraulic heat pump circuits (systems).....	138
G.3	Hydraulic heat source connections	151
Annex H (informative)	Calculation requirements for seasonal performance factors	153
H.1	Minimum and target SPF-values for heat pumps	153
Annex I (informative)	Simplified calculation Method for determining the degree of coverage and power share of heat pumps	154
I.1	General aim.....	154
I.2	Method of calculation	154
I.3	Degree of coverage and power share for 3 European climate zones	160
Annex J (informative)	Example Building – Preliminary Design of a heat pump system	167
J.1	Introduction.....	167
J.2	Building data – Information collection	168

J.3	Heat load calculation	168
J.4	Cooling Load calculation	175
J.5	Domestic hot water power requirements	178
J.6	Available resources – heat source outdoor air	178
J.7	Heat emission and distribution system	179
J.8	System concept	182
	Annex K (informative) Design Check Lists	186
K.1	Introduction	186
K.2	Information collection	186
K.3	System concept and preliminary design (Clause 5)	188
K.4	Final design deliverable (Clause 6)	188
K.5	Hand over design package deliverable (see 6.9)	189
	Bibliography	191
