SLOVENSKI STANDARD
oSIST prEN IEC 63315:2025

01-december-2025

Oprema za avdio/video, informacijsko in komunikacijsko tehnologijo - Varnost - Prenos enosmerne moči med porti opreme IKT z uporabo ožičenja in kablov IKT pri napetostih, ki ne presegajo 60 V enosmerno

Audio/video, information and communication technology equipment – Safety – DC power transfer between ICT equipment ports using ICT wiring and cables at voltages not exceeding 60 V DC

108/851/CDV

COMMITTEE DRAFT FOR VOTE (CDV)

PROJECT NUMBER:	
IEC 63315 ED1	
DATE OF CIRCULATION:	CLOSING DATE FOR VOTING:
2025-10-10	**2026-01-02**
SUPERSEDES DOCUMENTS:	
108/840/NP, 108/846/RVN	

IEC TC 108 : SAFETY OF ELECTRONIC EQUIPMENT WITHIN THE FIELD OF AUDIO/VIDEO, INFORMATION TECHNOLOGY AND COMMUNICATION TECHNOLOGY

SECRETARIAT:	SECRETARY:
United States of America	Ms Valara Davis
OF INTEREST TO THE FOLLOWING COMMITTEES:	HORIZONTAL FUNCTION(S):
TC 23, TC 34, TC 61, TC 62, TC 72, TC 100	TC 108 Horizontal Group Safety

ASPECTS CONCERNED:

Safety

☒ SUBMITTED FOR CENELEC PARALLEL VOTING	☐ NOT SUBMITTED FOR CENELEC PARALLEL VOTING
Attention IEC-CENELEC parallel voting The attention of IEC National Committees, members of CENELEC, is drawn to the fact that this Committee Draft for Vote (CDV) is submitted for parallel voting. The CENELEC members are invited to vote through the CENELEC online voting system.

This document is still under study and subject to change. It should not be used for reference purposes.

Recipients of this document are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Recipients of this document are invited to submit, with their comments, notification of any relevant “In Some Countries” clauses to be included should this proposal proceed. Recipients are reminded that the CDV stage is the final stage for submitting ISC clauses. (SEE AC/22/2007 OR NEW GUIDANCE DOC).

TITLE:

Audio/video, information and communication technology equipment – Safety – DC power transfer between ICT equipment ports using ICT wiring and cables at voltages not exceeding 60 V DC

PROPOSED STABILITY DATE: 2029

NOTE FROM TC/SC OFFICERS:

Copyright © 2025 International Electrotechnical Commission, IEC. All rights reserved. It is permitted to download this electronic file, to make a copy and to print out the content for the sole purpose of preparing National Committee positions. You may not copy or "mirror" the file or printed version of the document, or any part of it, for any other purpose without permission in writing from IEC.

Link to Committee Draft for Vote (CDV) online document:

https://osd.iec.ch/#/editor/archive/35bc1c6a-32c8-9e36-e063-dd13000ac89e/en/CCDV/1

How to access

This link leads you to the Online Standards Development (OSD) platform for National Mirror Committee's (NMC) comments. The project draft may be found further down this document.

Resource materials

We recommend NCs to review the available materials to better understand the member commenting on the OSD platform.

This includes the:

- OSD NC roles overview
- How to add and submit comments to the IEC

Contact

Should you require any assistance, please contact the IEC IT Helpdesk.

CONTENTS

FOREWORD 3
Introduction 5
1 Scope 6
2 Normative references 6
3 Terms and definitions 7
4 Abbreviated terms 10
5 Electrically-caused injury, electrical sources and safeguards 10
6 Electrically-caused fire, power sources and safeguards 10
6.1 General requirements 10
6.2 Normal operating conditions 11
6.2.1 PSE 11
6.2.2 PD 12
6.3 Circuit safeguards 12
6.3.1 DC power transfer through a remote ICT interface 12
6.3.2 DC power transfer through a local ICT interface 12
6.3.3 PSE output current in abnormal condition and single fault condition (during interconnection to other equipment) 13
6.3.4 Voltage limits for PSE under abnormal operating conditions from external loads 14
6.4 Supplementary safeguards during single fault conditions in the PSE 14
6.4.1 Voltage limits for PSE under fault conditions 14
6.4.2 Supplementary Safeguard for the PD during a PSE overvoltage single fault condition 16
6.5 Protocol safeguards 16
6.5.1 General 16
6.5.2 Data packet negotiated power systems safeguard requirements for PSE rated output above 100 W 17
6.5.3 Protocol updates 18
Annex A (informative) Examples of common interfaces which are in or out of the scope of this document 19
Annex B (informative) Example behaviours of non-static power sources and qualified loads 20
B.1 Non-static power sources 20
B.2 Qualified loads 20
Annex C (informative) Rationale for 6.3 and 6.4 22
Annex D (informative) Rationale and examples of communication errors and protocol safeguards 24
D.1 Rationale for 6.5 24
D.1.1 General 24
D.1.2 Software Architecture and software faults 24
D.1.3 Soft errors 24
D.1.4 Protocol elements and supplemental information 24
D.1.5 Cable marker 26
D.1.6 Source reference 27
D.2 Typical relationships between errors and protocol safeguards 27
D.3 Communication errors 28
D.3.1 General 28

oSIST prEN IEC 63315:2025

D.3.2 Corruption 28
D.3.3 Unintended repetition 28
D.3.4 Incorrect sequence 28
D.3.5 Loss 29
D.3.6 Unacceptable delay 29
D.3.7 Insertion 29
D.3.8 Masquerade 29
D.3.9 Addressing 29
D.4 Protocol safeguards 29
D.4.1 General 29
D.4.2 Sequence number 29
D.4.3 Time stamp 29
D.4.4 Time expectation 30
D.4.5 Connection authentication 30
D.4.6 Feedback message 30
D.4.7 Data integrity assurance 30
D.4.8 Redundancy with cross checking 30
D.4.9 Different data integrity assurance systems 30
Annex E (informative) Communication errors and USB Power Delivery protocol safeguards 32
E.1 General 32
E.2 USB PD example walk-through 33
Bibliography 37

Figure 1 – PSE maximum sustained output fault voltage limit 15
Figure E.1 – Block diagram of daisy chained USB devices 33
Figure E.2 – Flowchart of USB power modes 35

Table 1 – 10
Table 2 – Overview of electrically-caused fire clauses for PSE's (3.2) and PD's (3.3) 11
Table 3 – Current limits in abnormal conditions and single-fault conditions for PSE (3.2) output circuits when no fault current value exists 14
Table 4 – Voltage limits in single-fault conditions for PSE output circuits when no fault voltage value exists 15
Table D.1 – Overview of the effectiveness of the various measures on the possible errors 27
Table E.1 – Communication error types and USB PD protocol safeguards 32
Table E.2 – Examples of different USB PD power modes and how limits are derived 34
