

SLOVENSKI STANDARD
oSIST prEN IEC 63593:2025
01-julij-2025

Železniške naprave - Vozna sredstva - Specifikacija in preverjanje porabe energije

Railway applications - Rolling stock - Specification and verification of energy consumption

Applications ferroviaires - Matériel roulant - Spécification et vérification de la consommation d'énergie

Ta slovenski standard je istoveten z: prEN IEC 63593:2025

COMMITTEE DRAFT FOR VOTE (CDV)

PROJECT NUMBER: IEC 63593 ED1	
DATE OF CIRCULATION: 2025-06-06	CLOSING DATE FOR VOTING: 2025-08-29
SUPERSEDES DOCUMENTS: 9/3108/CD, 9/3139A/CC	

IEC TC 9 : ELECTRICAL EQUIPMENT AND SYSTEMS FOR RAILWAYS	
SECRETARIAT: France	SECRETARY: Mr Denis MIGLIANICO
OF INTEREST TO THE FOLLOWING COMMITTEES:	HORIZONTAL FUNCTION(S):
ASPECTS CONCERNED: Energy Efficiency	
<input checked="" type="checkbox"/> SUBMITTED FOR CENELEC PARALLEL VOTING Attention IEC-CENELEC parallel voting The attention of IEC National Committees, members of CENELEC, is drawn to the fact that this Committee Draft for Vote (CDV) is submitted for parallel voting. The CENELEC members are invited to vote through the CENELEC online voting system.	<input type="checkbox"/> NOT SUBMITTED FOR CENELEC PARALLEL VOTING

This document is still under study and subject to change. It should not be used for reference purposes.

Recipients of this document are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Recipients of this document are invited to submit, with their comments, notification of any relevant "In Some Countries" clauses to be included should this proposal proceed. Recipients are reminded that the CDV stage is the final stage for submitting ISC clauses. (SEE [AC/22/2007](#) OR [NEW GUIDANCE DOC](#)).

TITLE: Railway applications – Rolling stock – Specification and verification of energy consumption
--

PROPOSED STABILITY DATE: 2028

FOREWORD.....	6
1 Scope.....	8
2 Normative references	8
3 Terms, definitions and abbreviations	8
4 General	12
4.1 Train modes.....	12
4.2 Energy categories.....	14
4.3 Service profiles.....	14
4.4 Verification acceptance criteria	15
5 Traction and Auxiliaries (in-service with commercial operation, without HVAC).....	16
5.1 General.....	16
5.2 Operational requirements.....	16
5.2.1 General	16
5.2.2 Train data.....	16
5.2.3 Infrastructure conditions	17
5.2.4 Timetable and driving style	18
5.2.5 Energy supply network characteristics.....	19
5.2.6 Environmental conditions.....	20
5.2.7 ESS charging conditions.....	21
5.3 Simulation requirements	21
5.3.1 General	21
5.3.2 Timetable	21
5.3.3 Annual energy consumption.....	21
5.3.4 Documentation	22
5.4 Verification	22
5.4.1 General	22
5.4.2 Infrastructure conditions	22
5.4.3 Timetable	22
5.4.4 Measurement equipment	23
5.4.5 Test rules	24
5.4.6 Documentation	24
5.5 Post-processing of test results	25
5.5.1 General	25
5.5.2 Train data.....	25
5.5.3 Running time and standstill time	25
5.5.4 Environmental conditions.....	25
5.5.5 Energy supply network characteristics	26
6 Traction and Auxiliaries (in-service without commercial operation and parking, without HVAC).....	26
6.1 General.....	26
6.2 Operational requirements.....	26
6.2.1 General	26
6.2.2 Load conditions	27
6.2.3 Auxiliary management	27

6.2.4	Energy supply network characteristics	27
6.2.5	Environmental conditions	27
6.2.6	ESS charging conditions	27
6.3	Simulation requirements	27
6.3.1	General	27
6.3.2	Thermal stability	27
6.3.3	Auxiliary conversion losses caused by HVAC supply	27
6.3.4	Energy storage systems	27
6.3.5	Annual energy consumption	28
6.3.6	Documentation	28
6.4	Verification	28
6.4.1	General	28
6.4.2	Test preparation	28
6.4.3	Environmental conditions	28
6.4.4	Measurement equipment	28
6.4.5	ESS charging conditions	28
6.4.6	Test duration	28
6.4.7	Documentation	29
6.5	Post-processing of test results	29
7	HVAC	30
7.1	General	30
7.2	Methods	30
7.3	Climatic and operational requirements	30
7.3.1	In-service with commercial operation mode	30
7.3.2	In-service without commercial operation mode	31
7.3.3	Parking mode	31
7.3.4	Total annual consumption	31
7.4	Simulation requirements	32
7.4.1	General	32
7.4.2	Documentation	32
7.5	Verification	32
7.5.1	General	32
7.5.2	Test rules	32
7.5.3	Documentation	32
7.6	Post-processing	32
Annex A (normative)	Definition of parameters for user-defined service profile	33
A.1	General	33
A.2	Infrastructure characteristics	33
A.3	Electric traction system characteristics	34
A.4	Service characteristics	34
A.5	Fuel characteristics	36
Annex B (informative)	Example of standard service profiles	37
B.1	General	37
B.2	Profile B.1 Europe – Suburban on flat track	38
B.3	Profile B.2 Europe - Regional on flat track	39
B.4	Profile B.3 Europe - Intercity on flat track	40
B.5	Profile B.4 Europe - High speed on flat track	42
B.6	Profile B.5 Europe - Freight with gradients	43

B.7	Profile B.6 Europe – Metro on flat track.....	45
B.8	Profile B.7 Japan – Urban and suburban on flat track.....	47
B.9	Profile B.8 Japan - Regional with gradients.....	48
B.10	Profile B.9 Japan – Local with gradients.....	50
B.11	Profile B.10 Japan – High speed on flat track.....	51
B.12	Profile B.11 Japan - High speed with gradients.....	53
Annex C (normative) Definition of operational point matrix and operating hours for Europe.....		55
C.1	General.....	55
C.2	In-service with commercial operation.....	55
C.3	In-service without commercial operation.....	57
C.4	Parking mode.....	59
Annex D (informative) Application Guide.....		60
D.1	Objectives for use in procurement projects.....	60
D.2	Application guide.....	60
