## oSIST prEN ISO 16646:2025

01-julij-2025

---

**Fuzijske naprave - Merila za načrtovanje in delovanje zadrževalnih in prezračevalnih sistemov v objektih za fuzijo tritija in objektih za ravnanje s fuzijskim gorivom (ISO 16646:2024)**

Fusion installations - Criteria for the design and operation of confinement and ventilation systems of tritium fusion facilities and fusion fuel handling facilities (ISO 16646:2024)

Fusionsanlagen - Kriterien für die Auslegung und den Betrieb von Einschluss- und Lüftungssystemen von Tritiumfusionsanlagen und Anlagen zur Handhabung von Fusionsbrennstoff (ISO 16646:2024)

Installations de fusion - Critères pour la conception et l'exploitation des systèmes de confinement et de ventilation des installations de fusion avec tritium et des installations de traitement des combustibles de fusion (ISO 16646:2024)

<b>Foreword</b>	<b>v</b>
<b>Introduction</b>	<b>vi</b>
<b>1 Scope</b>	<b>1</b>
<b>2 Normative references</b>	<b>1</b>
<b>3 Terms and definitions</b>	<b>1</b>
<b>4 General confinement specificities of tritium fusion facilities or fusion fuel handling facilities</b>	<b>7</b>
4.1 General	7
4.2 Inventories to identify for fusion facilities confinement	9
4.3 Specific systems or loads used in fusion facilities	10
4.4 General description of confinement systems for fusion facilities	10
4.4.1 General	10
4.4.2 First confinement system	13
4.4.3 Secondary confinement system	14
4.4.4 Fuel cycle systems	15
4.4.5 Tritium material compatibility	15
<b>5 Functions and safety aspects for confinement and ventilation systems</b>	<b>15</b>
5.1 General	15
5.2 Main functions	16
5.3 General principles	17
5.4 Risk assessment procedure	17
5.4.1 Preliminary analysis	17
5.4.2 Risk evaluation	19
5.4.3 Safety classification	20
<b>6 Architecture and description of the different confinement systems</b>	<b>21</b>
6.1 General	21
6.2 Static confinement of radioactive material	21
6.2.1 Containment barriers and systems	21
6.2.2 Isolation function (static containment)	21
6.3 Ventilation of the volumes within the first confinement system	23
6.3.1 General	23
6.3.2 Vacuum vessel exhaust process	23
6.3.3 Primary containment pressure limiter	23
6.3.4 Local and/or centralised detritiation system	24
6.3.5 Ventilation of the volume between first and second containment barriers of the first confinement system	24
6.3.6 Cryogenic systems	24
6.4 Ventilation of the volumes within the second confinement system	25
6.4.1 General	25
6.4.2 Rooms and building ventilation systems	25
6.4.3 Detritiation systems	25
6.4.4 Local ventilation systems	26
6.4.5 Ventilation of the volumes located outside the secondary confinement	26
6.4.6 Miscellaneous ventilation systems not connected with containment envelopes	26
<b>7 Requirements for the design of ventilation systems</b>	<b>27</b>
7.1 General	27
7.2 Dynamic confinement	27
7.2.1 General	27
7.2.2 Classification of the installation into potentially contaminated areas (confinement classification)	28
7.2.3 Factors influencing the design of ventilation systems	30
7.2.4 Negative pressure	30

**ISO 16646:2024(en)**

7.2.5	Air velocities between areas.....	31
7.2.6	Basic air pattern and clean-up systems.....	32
7.2.7	Classification into ventilation types.....	33
7.2.8	Optimization of air exchanges.....	33
7.2.9	Layout and location of the ventilation ducts.....	37
7.2.10	Elaboration of the ventilation diagram and calculation of the pressure drops.....	37
7.3	Filtration.....	37
7.3.1	General.....	37
7.3.2	HEPA filters.....	38
7.3.3	Air detritiation system.....	38
7.3.4	Other gas-trapping devices.....	41
<b>8</b>	<b>Management of specific risks.....</b>	<b>41</b>
8.1	Control of combustible gases in the buildings.....	41
8.2	Control of cryogenic liquid/ gases in the buildings.....	42
8.3	Management of ambient conditions.....	42
8.3.1	Tritium airborne contamination.....	42
8.3.2	Air conditioning of safety-classified components.....	43
8.3.3	Ventilation systems of the control rooms.....	43
8.4	Prevention of risks linked to releases of heat, gases or toxic vapours.....	44
8.5	Prevention of risks linked to the deposition of matter in ventilation ducts.....	44
8.6	Prevention of fire hazard.....	45
8.6.1	Compartmentalization.....	45
8.6.2	Fire compartments (fire sectors).....	45
8.6.3	Fire areas.....	47
8.6.4	Containment compartments.....	47
8.7	Consideration of external hazards.....	48
<b>9</b>	<b>Dispositions concerning the management and the operation of the ventilation systems.....</b>	<b>49</b>
9.1	Organization and operating procedures.....	49
9.2	Technical operating instructions.....	49
9.3	Operational management issues.....	51
9.4	Test procedures and maintenance.....	51
9.4.1	General.....	51
9.4.2	Qualification.....	51
9.4.3	Pre-commissioning inspection tests.....	51
9.4.4	Acceptance tests.....	52
9.4.5	Commissioning tests.....	52
9.4.6	Maintenance and other periodic tests.....	53
9.5	Monitoring of the confinement system.....	54
9.6	Control of the ventilation system to prevent fire hazards.....	55
9.6.1	General.....	55
9.6.2	Fire control philosophy.....	55
<b>10</b>	<b>Instrumentation and Control (I&amp;C).....</b>	<b>57</b>
10.1	Control.....	57
10.2	Instrumentation.....	57
10.3	Alarms.....	58
	<b>Annex A (informative) Guidance on airborne contamination risks.....</b>	<b>59</b>
	<b>Annex B (informative) Examples of detritiation technologies.....</b>	<b>66</b>
	<b>Annex C (informative) Safety classification examples.....</b>	<b>68</b>
	<b>Annex D (informative) Typical values for leak rates.....</b>	<b>70</b>
	<b>Annex E (informative) Requirements for ventilation system air filters used in nuclear facilities.....</b>	<b>73</b>
	<b>Bibliography.....</b>	<b>79</b>

**ISO 16646:2024(en)****Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 85, *Nuclear energy*, Subcommittee SC 2, *Radiological protection*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html)
