EUROPÄISCHE NORM

EN 14059

September 2026

ICS 97.195

Supersedes EN 14059:2002

English Version

Decorative oil lamps - Safety requirements and test methods

Lampes à huile décoratives - Exigences de sécurité et méthodes d'essai

Dekorative Öllampen - Sicherheitsanforderungen und Prüfverfahren

This European Standard was approved by CEN on 31 August 2026.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

EN 14059:2026 (E)**European foreword**

This document (EN 14059:2026) has been prepared by Technical Committee CEN/TC 46 “Fireplaces for liquid fuels”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2027, and conflicting national standards shall be withdrawn at the latest by March 2027.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 14059:2002.

EN 14059:2026 includes the following significant technical changes with respect to EN 14059:2002:

- addition of non-re-fillable oil lamps to the Scope;
- technical improve throughout the entire document;
- addition of requirements and tests for non-re-fillable oil lamps.

Any feedback and questions on this document should be directed to the users’ national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

Introduction

The ingestion and resultant aspiration of lamp oils can lead to severe lung damage and even death.

Small children aged up to three years are particularly at risk of drinking the oil directly from the lamps. Very small amounts of lamp oil, labelled with R 65 or H 304 (even 80 mg/kg to 150 mg/kg body weight have resulted in verifiable cases of death), are sufficient to cause severe lung complications with deadly effect.

This safety standard for oil lamps aims primarily to restrict the access of small children to the lamp oil contained in decorative oil lamps. However, it also covers some other safety aspects.

Products complying with this document should not be considered as being totally safe. It is realistic to expect that children will sometimes be able to gain access to the oil in the lamp. Products corresponding to this document significantly reduce the risk of serious or fatal incidents due to decorative oil lamps.

Attention is drawn to the fact that European regulations for lamp oil are in force (e.g. CLP and REACH).
