Druckanwendungen

This European Standard was approved by CEN on 21 June 2021 and includes Amendment 1 approved by CEN on 2 February 2026.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

EN 14917:2021+A1:2026 (E)**European foreword**

This document (EN 14917:2021+A1:2026) has been prepared by Technical Committee CEN/TC 342 “Metal hoses, hose assemblies, bellows and expansion joints”, the secretariat of which is held by SNV.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2026, and conflicting national standards shall be withdrawn at the latest by October 2026.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document includes Amendment 1 approved by CEN on 2 February 2026.

This document supersedes A1 EN 14917:2021 A1.

The start and finish of text introduced or altered by amendment is indicated in the text by tags A1 A1.

A1 This document has been prepared under a standardization request addressed to CEN by the European Commission. The Standing Committee of the EFTA States subsequently approves these requests for its Member States.

For the relationship with EU Legislation, see informative Annex ZA, which is an integral part of this document. A1

Modifications to EN 14917:2009+A1:2012:

- adaptation to Directive 2014/68/EU;
- general revision and correction;
- complete revision and restructuring of Clause 6, i.a.;
 - addition of design in the creep range;
 - modification of stress calculation for internal pressure capability;
 - reformulation of column instability calculation;
 - modification of in-plane instability calculation;
 - harmonisation of fatigue calculation for all bellows types and introduction of 4 fatigue curves for different material classes;
 - extension of material characteristics for calculating forces and moments on pressurised expansion joints;
- addition of Annex K for stress calculation of hardware;
- revision of Testing, inspection and documentation;
- revision of material properties in Annex B and Annex J;
- correction of Coefficient C_p .

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

EN 14917:2021+A1:2026 (E)**Introduction**

Metal bellows expansion joints are used as parts in pressure vessels or piping components.

If an expansion joint is designed and manufactured covered by EU-Directive 2014/68/EU a risk assessment has to be done. The possible risks of an expansion joint and how they have been dealt in this document are described in Annex I.

Sample Document

1 Scope

This document specifies the requirements for design, manufacture and installation of metal bellows expansion joints with circular cross section for pressure applications with maximum allowable pressure greater than 0,5 bar.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

3 Terms and definitions

For the purposes of this document the following terms and definitions apply.

3.1 expansion joint

metal equipment consisting of one or more bellows used to absorb movements such as caused by thermal or mechanical effects in piping or pressure vessels

Note 1 to entry: See also Clause 4 Classification.

3.2 bellows

flexible element consisting of one or more corrugations and the end tangents

3.3 corrugation convolution

flexible unit of a bellows with a leakproof wall consisting of one or more plies

3.4 ply

element of the bellows' wall usually made from sheet or strip material

3.5 end tangent

straight un-corrugated portion at the ends of a bellows

3.6 reinforcing collar

reinforcing sleeve or ring attached to the end tangent for reinforcement
