English Version

Eurocode 1 - Actions on structures - Part 1-4: Wind actions

Eurocode 1 - Actions sur les structures - Partie 1-4 :
Actions du vent

Eurocode 1 - Einwirkungen auf Tragwerke - Teil 1-4:
Windlasten

This draft amendment is submitted to CEN members for enquiry. It has been drawn up by the Technical Committee CEN/TC 250.

This draft amendment A1, if approved, will modify the European Standard EN 1991-1-4:2026. If this draft becomes an amendment, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for inclusion of this amendment into the relevant national standard without any alteration.

This draft amendment was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

Warning : This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

9 Modification to Annex B, “Pressure coefficients for pressures on surfaces”	5
10 Modification to Annex C, “Net pressure coefficients and force coefficients for canopies”	11
11 Modification to Annex D, “Force coefficients and friction coefficients”	12
12 Modification to Annex E, “Procedure for along-wind dynamic response”	13
13 Modification to Annex F, “Procedure for across-wind and torsional actions on susceptible buildings”	15
14 Modification to Annex G, “Procedure for across-wind dynamic and aeroelastic response of slender structures”	15
15 Modification to Annex H, “Dynamic characteristics of structures with linear elastic behaviour”	15
16 Modification to Annex I, “Response of steel lattice towers and guyed masts”	15

European foreword

This document (EN 1991-1-4:2026/prA1:2026) has been prepared by Technical Committee CEN/TC 250 “Structural Eurocodes”, the secretariat of which is held by BSI. CEN/TC 250 is responsible for all Structural Eurocodes and has been assigned responsibility for structural and geotechnical design matters by CEN.

This document is currently submitted to the CEN Enquiry.

This document will supersede EN 1991-1-4:2026.

NOTE Some modifications are purely editorial corrections to improve the quality of the document and these will not be tagged in the consolidated publication, as noted after the modification.

The first generation of EN Eurocodes was published between 2002 and 2007. This document forms part of the second generation of the Eurocodes, which have been prepared under Mandate M/515 issued to CEN by the European Commission and the European Free Trade Association.

The Eurocodes have been drafted to be used in conjunction with relevant execution, material, product and test standards, and to identify requirements for execution, materials, products and testing that are relied upon by the Eurocodes.

The Eurocodes recognise the responsibility of each Member State and have safeguarded their right to determine values related to regulatory safety matters at national level through the use of National Annexes.
