EUROPEAN STANDARD

NORME EUROPÉENNE

EUROPÄISCHE NORM

EN 50174-1

June 2018

ICS 35.110

Supersedes EN 50174-1:2009

English Version

Information technology - Cabling installation - Part 1: Installation specification and quality assurance

Technologies de l'information - Installation de câblages - Partie 1 : Spécification de l'installation et assurance de la qualité

Informationstechnik - Installation von Kommunikationsverkabelung - Teil 1: Installationsspezifikation und Qualitätssicherung

This European Standard was approved by CENELEC on 2018-05-21. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword ... 7

Introduction ... 8

1 Scope and conformance ... 10

1.1 Scope ... 10

1.2 Conformance ... 10

2 Normative references ... 10

3 Terms, definitions and abbreviations ... 11

3.1 Terms and definitions ... 11

3.2 Abbreviations ... 16

4 Requirements for specifying installations of information technology cabling ... 16

4.1 Documentation ... 16

4.1.1 General ... 16

4.1.2 Installation specification ... 17

4.1.3 Technical specification ... 19

4.1.4 Scope of work ... 25

4.1.5 Quality plan ... 27

4.1.6 Change control ... 27

4.2 Planning ... 27

4.2.1 Power supply/information technology cabling segregation requirements ... 27

4.2.2 Building entrance facilities (BEF)s ... 27

4.2.3 Pathways ... 28

4.2.4 Information technology cabling recommendations ... 30

4.2.5 Cabinets, frames and racks ... 30

4.2.6 Closures ... 31

4.2.7 Termination points ... 31

4.2.8 Spaces ... 32

4.3 Products and processes ... 33

4.3.1 General requirements ... 33

4.3.2 Pathway systems ... 33

4.3.3 Components ... 34

4.3.4 Labels ... 34

4.4 External network service provision ... 35

4.4.1 Requirements ... 35

4.4.2 Recommendations ... 35
4.5 Operating procedures ... 35
4.5.1 General requirements ... 35
4.5.2 Administration requirements ... 35
4.5.3 Protection from electrostatic discharge (ESD) ... 38
4.6 Maintenance ... 39
4.6.1 Requirements ... 39
4.6.2 Recommendations ... 39
5 Requirements for installers of information technology cabling ... 40
5.1 Documentation and administration ... 40
5.1.1 Installation specification requirements ... 40
5.1.2 Quality plan ... 40
5.1.3 Installation schedule requirements ... 41
5.1.4 Installation instructions requirements ... 41
5.1.5 Change control requirements ... 42
5.1.6 Documentation of the installed cabling ... 42
5.2 Products and processes ... 42
5.2.1 Compatibility of cabling components ... 42
5.2.2 Cabling component acceptance ... 42
5.2.3 Calibration and normalization of inspection and test equipment ... 43
5.2.4 Pathway systems ... 43
5.2.5 Labelling ... 43
5.3 Power supplies ... 43
5.4 Surveys ... 43
5.4.1 Pathways ... 43
5.4.2 Cabinets, frames and racks ... 43
5.4.3 Closures ... 43
6 Installation and operational complexity ... 44
6.1 Requirements ... 44
6.2 Recommendations ... 44
Annex A (normative) Minimum requirements for technical specifications and quality plans ... 45
A.1 General ... 45
A.2 Technical specification ... 45
A.3 Quality plan ... 45
Annex B (normative) Polarity maintenance: Connecting hardware for multiple optical fibres ... 46
B.1 General ... 46

B.2 Duplex connecting hardware interfaces 46
B.2.1 Duplex plugs, adapters and cords 46
B.2.2 Polarity of installed cabling segments 48
B.2.3 The Symmetrical Positioning Method 48
B.2.4 The Reverse-Pair Positioning Method 49
Annex C (informative) Polarity maintenance: Connecting hardware interfaces for arrays 50
C.1 Connecting hardware interfaces for arrays with 12 optical fibres per row 50
C.1.1 General 50
C.1.2 Array connecting hardware components 50
C.1.2.1 General 50
C.1.2.2 Cables and array connector patch cords 50
C.1.2.3 Array adapters 51
C.1.2.4 Transition assemblies for duplex cabling 51
C.1.3 Array Connectivity Method 52
C.1.3.1 Duplex cabling 52
C.1.3.2 Array cabling 53
C.2 Connecting hardware interfaces for arrays with more than 12 optical fibres per row 54
Annex D (informative) Terminating balanced cables on terminating blocks in distributors 55
D.1 General 55
D.2 The use of the same type of connector at each end of a cable 55
D.3 The use of a different type of connector at each end of a cable 55
D.4 Relation between the pins of connectors according to EN 60603-7 and the tags of a terminating block 55
Annex E (informative) Compatibility between transmission systems (balanced and unbalanced) sharing the same cable sheath within information technology cabling 57
E.1 General 57
E.2 Recommendations concerning cable sharing 57
E.3 Factors to be taken into account to ensure satisfactory performance 57
E.3.1 General 57
E.3.2 Factors concerning the disturbing transmission system 58
E.3.3 Cabling characteristics 58
E.3.3.1 Crosstalk loss 58
E.3.3.2 Insertion loss 58
E.3.3.3 Termination 59

E.3.4 The disturbed transmission system 59

E.4 Guidelines for reducing interference between transmission systems within the same cable sheath 59

E.5 Cabling qualification 59

E.6 Particular installation requirements and recommendations 59

E.7 Cable management 59

E.8 Regulatory aspects 60

Annex F (normative) Sampling plans and marginal results 61

F.1 Sampling plans 61

F.1.1 General 61

F.1.2 Balanced cabling in accordance with the EN 50173 series of standards 61

F.1.3 Optical fibre cabling in accordance with the EN 50173 series of standards 63

F.2 Marginal results 64

F.2.1 Marginal test results 64

F.2.2 Requirements 65

F.2.3 Recommendations 65

F.2.4 Balanced cabling in accordance with the EN 50173 series of standards 65

F.2.5 Optical fibre cabling 65

F.3 Non-compliant results 66

Annex G (informative) “Reaction to fire” performance of cables 67

G.1 EuroClass designation 67

G.2 Application of cables of a given EuroClass designation 67
