CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	7
2 Terms and definitions	7
3 General	10
4 Classification of DG generators	11
4.1 General	11
4.2 Induction (asynchronous) generators.....	11
4.3 Synchronous generators.....	12
4.4 Static power converters	12
5 Survey of EMC requirements for DG	12
6 Proposed EMC requirements and tests.....	15
6.1 General test requirements	15
6.2 Proposed tests	17
7 Emission	18
7.1 General	18
7.2 Harmonics	18
7.2.1 Mechanisms of harmonic current emissions	18
7.2.2 Proposed limits and tests for harmonic current emissions	19
7.2.3 Summary of harmonic current emission tests	21
7.2.4 Product test procedure for harmonic current emissions	21
7.2.5 System test procedure for harmonic current emissions	23
7.3 Unbalance.....	23
7.4 Voltage fluctuation and flicker	24
7.4.1 General	24
7.4.2 Flicker test conditions for DG equipment exporting power to the public supply	25
7.5 DC injection.....	26
7.6 Short duration over voltages.....	26
7.6.1 General	26
7.6.2 Short duration over voltage test procedure	28
7.7 Switching frequencies	29
8 Immunity	30
8.1 General	30
8.2 Voltage dips and short interruptions	31
8.2.1 General	31
8.2.2 Short duration voltage dips test procedure.....	36
8.2.3 Longer duration voltage dips test procedure	37
8.3 Frequency variations	37
8.4 Harmonics and interharmonics	39
Annex A (informative) Examples of harmonic measurements and analysis on DG equipment connected to low voltage networks	41
Bibliography.....	46

Figure 1 – General test setup for combined emission/immunity tests	16
Figure 2 – Over voltages produced during DG quick disconnection	27
Figure 3 – Over voltages produced during DG slow disconnection (greater than 10 ms).....	27
Figure 4 – CBEMA curve (IEC 61000-2-14).....	28
Figure 5 – Distortion due to high power PV inverter	30
Figure 6 – Voltage dips and short interruption test levels from different standards	32
Figure 7 – Voltage tolerance curves for DG immunity requirements	33
Figure 8 – DG immunity test for short dips/interruptions: an example	36
Figure 9 – Test pattern for a DG voltage dip tolerance curve	36
Figure 10 – DG frequency variation (increment) immunity test: an example	39
Figure A.1 – Total current distortion due the network and the connected inverter.....	41
Figure A.2 – Harmonic distortions at different input power of a 5 kW inverter	42
Figure A.3 – DG equipment with LCL filter	42
Figure A.4 – Impedance model for DG equipment with LCL filter.....	43
Figure A.5 – Voltage spectrum: four AICs connected	44
Figure A.6 – Current harmonics: four AICs at 10 A r.m.s. (0,11 / _N)	44
Table 1 – DG specifications and emission requirements applied in different countries	13
Table 2 – Proposed EMC requirements and tests for DG equipment	17
Table 3 – Different suggested product and system tests for harmonic emissions	21
Table 4 – Voltage distortion of simulated public supply (IEC 61000-3-2)	22
Table 5 – Voltage distortion of simulated public supply (IEC 61000-3-12)	22
Table 6 – Limits for DG up to 75 A/phase (in percent of I_{rms})	23
Table 7 – Distortion values for a flat top and peaky voltage distortion V-THD of 4,0 %	23
Table 8 – Protection requirements for PV inverters under voltage disturbances	34
Table 9 – Protection requirements for PV inverters under frequency disturbances	38
Table 10 – Harmonic voltage disturbance levels for odd harmonics (IEC 61000-4-13).....	40
Table A.1 – THD of increasing numbers of AICs with LCL filters connected to the network.....	43

INTERNATIONAL ELECTROTECHNICAL COMMISSION

ELECTROMAGNETIC COMPATIBILITY (EMC) –**Part 3-15: Limits –****Assessment of low frequency electromagnetic immunity and emission requirements for dispersed generation systems in LV network****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a Technical Report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

IEC 61000-3-15, which is a technical report, has been prepared by subcommittee 77A: Low frequency phenomena, of IEC technical committee 77: Electromagnetic compatibility.

The text of this technical report is based on the following documents:

Enquiry draft	Report on voting
77A/744/DTR	77A/759/RVC

Full information on the voting for the approval of this technical report can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all the parts in the IEC 61000 series, published under the general title *Electromagnetic compatibility* can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.
